

CARBOINDUSTRIAS COLOMBIA

COAL FOR ALL TYPES OF INDUSTRY

www.carboindustrias.com

About Company

Since 2009 Carboindustrias Colombia has produced and commercialized mineral coal & coke.

Sustainability is central to everything we do and we maintain a great relationship with the local people in the North of Santander by supporting the growth of vulnerable communities while reducing our environmental impact at all times.

Our holistic and dedicated approach has helped us to become a market leader within the mining industry and become recognised as a responsible and trusted supplier of high quality coal & coke.

”

We strive for constant care of product quality, carrying out environmentally responsible practices.

OUR Mission

We continue to improve our production and logistical procedures so our clients are guaranteed a reliable & sustainable supplier while we ensure the availability of Colombia's natural resources for future generations.

OUR Vision

By 2027 Carboindustrias Colombia aims to be recognized globally as a leading company in the production and transformation of mineral coal while generating well-being for everything that surrounds it.

OUR Products

With over a decade of experience
we have established a great
comercial relationship with mine
owners all around
the North of Santander.

Coke

Our coke is ideal for the iron-alloying industry, acting as an excellent reducer of iron ore due to its reactive capacity.

Also, its very low content of phosphorus makes it very desirable in the international market, avoiding problems of fragilization in the ferroalloying process.

SPECIFICATIONS			
PARAMETER	UNIT	GUARANTEED	ANALYSIS METHOD
Moisture	%	6.0 Max	ASTMD3302-07
ANALYSIS	NEXT	(DRY BASE)	
Ash	%	12 Max	ASTM D3174-04
Volatile	%	1.8 Max	ASTM D3175-07
Fixed Carbon	%	85 Min	ASTM D32172
ANALYSIS	CHEMICAL	(BASE AS RECEIVED)	
Sulphur	%	0.8 Max	ASTM D4239-08* METH B
Phosphorus	%	0.007 Max	ASTM D2795-95

We produce and classify the material in any required granulometry and quality.

Coking coal

Considered as A bituminous carbon, high content of volatile matter, low mineral in sulfur and ash terms. Additionally considered in the international market with the lowest content of phosphorus.
